Final Symposium of the ECOM Project

Tuesday, November 10, 2015 - 13:00

Members of the ECOM project will gather for a final symposium on November 10th 2015 in Stockholm, prior to the European Scientific Conference on Applied Infectious Disease Epidemiology (ESCAIDE). ECOM ? which stands for *Effective Communication in Outbreak Management* ? is an EU funded project that aims to develop strategies for improving risk-communication during major pandemic outbreaks in Europe.

A dialogue for a low-carbon Europe

Thursday, September 17, 2015 - 10:00

Technology and top-down political decisions are not enough if Europe wants to become a low-carbon society. Broad civil society participation is key to this transition. The European Commission has acknowledged that the governance process of the new Energy Union should involve an energy dialogue with stakeholders to inform policy-making and support active engagement in managing the energy transition.?

New epidemic and pandemic phenomena: socio-economic consequences and policy issues

Tuesday, October 27, 2015 - 09:30

A conference about the socio-economic impact that epidemics and pandemics may have will be held in Milan, October 27, with the collaboration of ASSET project. The event was inspired by the recent Ebola outbreak in West Africa, which brought significant consequences on the economic and social structures of the three countries involved by the epidemic.

BECOME A MEDIA TRAINER IN PUBLIC HEALTH EMERGENCIES ATTEND A TRAINING OF TRAINERS WORKSHOP

Wednesday, September 9, 2015 (All day)

The World Federation of Science Journalists (WFSJ), in partnership with the World Health Organization (WHO), is organizing a series of two-day Training of Trainers workshops. These training workshops are part of WFSJ's and WHO's efforts to help build a professional network of local trainers in Africa and the Eastern Mediterranean region, specialized in training journalists on covering public health emergencies and pandemic influenza in particular.

The Travelling Disease. From plague to Ebola, historic and present state of epidemics

Wednesday, February 25, 2015 (All day)

Epidemics may spread fast and since we are constantly improving our transportation possibilities, virus and bacteria are taking advantage of that. For centuries, harbours have been critical junctions through which diseases moved and diffused, and this led to the construction of specific buildings to isolate those who were sick or suspected of being infected. Nowadays we also have airports and much more persons moving all around the world, increasing the potential spread of infectious agents.
