Immuniser Lyon

In the context of a Europe increasingly hesitant about vaccination, with dropping vaccination coverage, *Immuniser Lyon* was a French campaign aiming to re-inform the population of the greater Lyon area in centre-east of France, of the proven benefits of vaccination and to incite people of all ages (children, adults, seniors) to be up-to-date with their vaccinations.

Health mediation in France

Since its creation in 2000, the National Human Rights Romeurope alerted the authorities to the need to take better account of difficulties of access to care of foreign Roma people living in France. Following extensive discussions and in order to verify the relevance of these recommendations for access to rights and health, the Directorate General of Health supported in 2008-2009 an action of project engineering intended to present plans of development of mediation pilot projects.

Population consultation, two-way communication and decision

An example of population consultation project was started recently by the French Ministry of Health, Marisol Touraine, who intends to consult the population on the matter of mandatory vaccination, as a part of a wide-ranging review of immunisation policies. This initiative comes after a report confirmed that vaccination is a sensitive society issue, which needs a large consultation of all stakeholders, including the civil society, with the aim of engaging them in a discussion about immunisation and its importance to public health.
