## COMPLEX NARRATIVES, DIFFICULT TO SHARE

# Conspiracy Theory

Secret organizations that manipulate societies. Their aims:

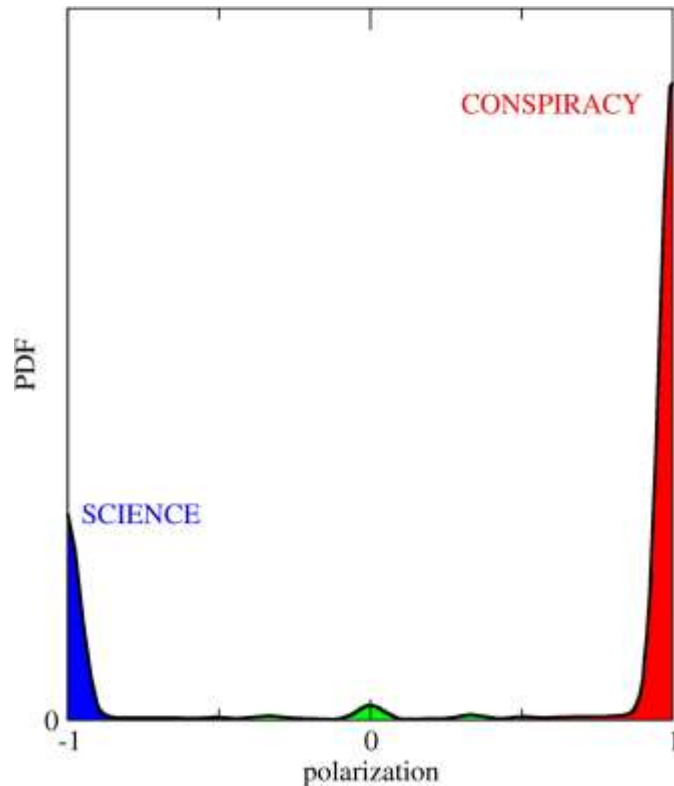

- Hide secret technologies
- Weather Control
- Unify the world under a single government
- Manipulate public opinion via main-stream media

## MYTHOLOGICAL NARRATIVES TO SIMPLIFY WORLD'S COMPLEXITY

## Omophily, Confirmation Bias and Polarization: the birth of Echochambers

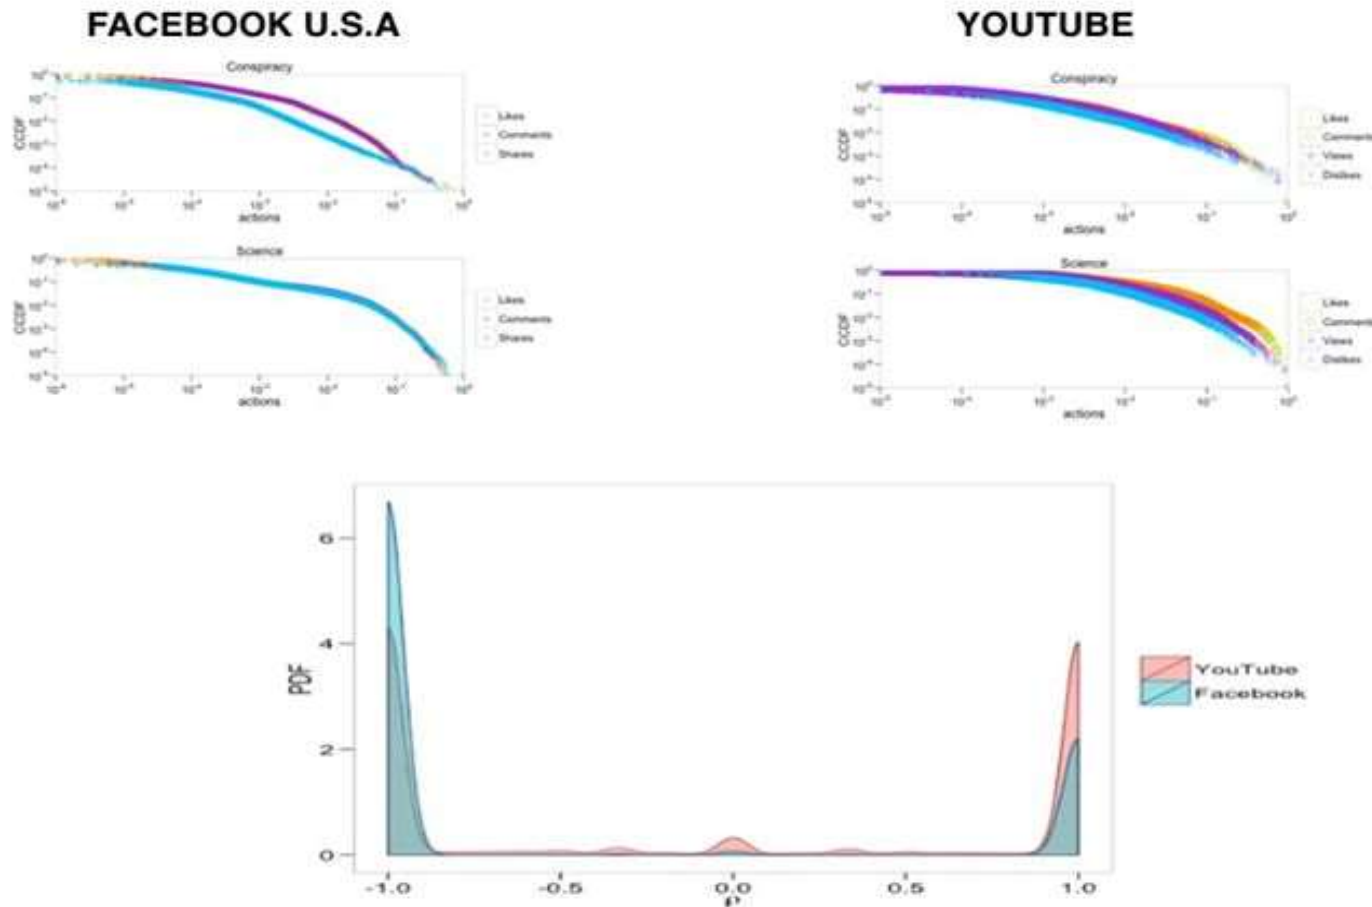

- Users are highly polarized
- The higher the online activity, the higher the polarizzazione (both science and conspiracy)
- User locked in **ECHOCHAMBERS**

# Facebook vs YouTube

Users are “indistinguishable” (without looking at the contents)

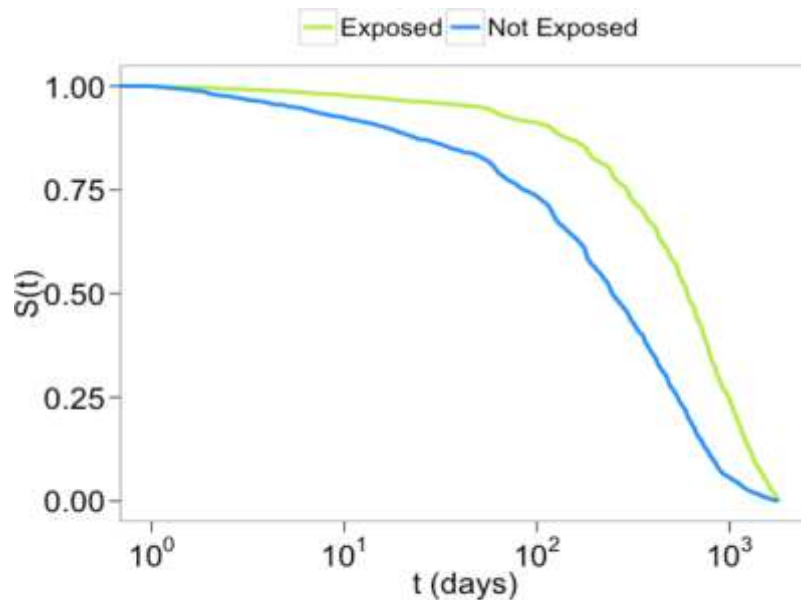

Same polarization on different media

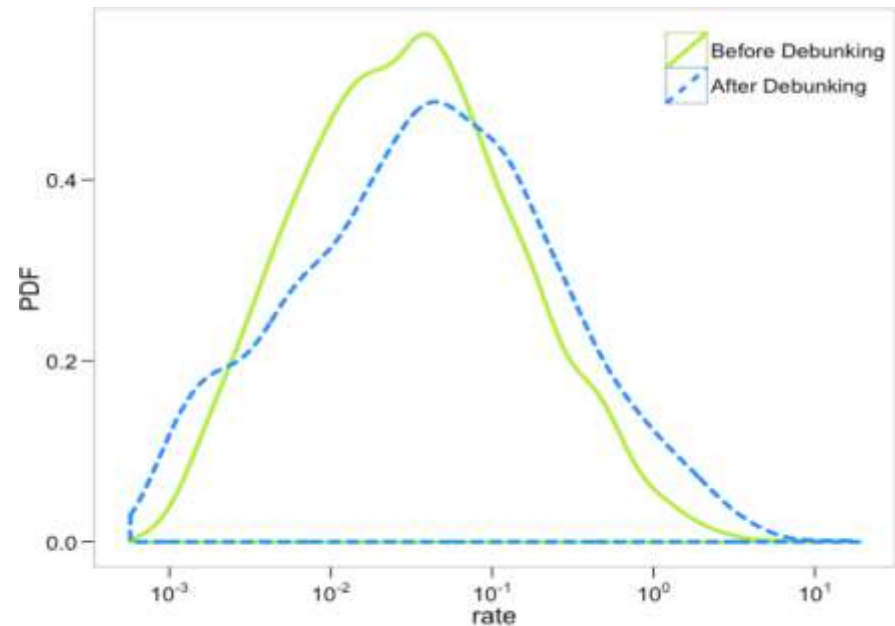

# Debunking & Backfire

Likes

Likes

- The lifetime of false news increases for users exposed to debunking
- The interactions with false news increases for users exposed to debunking

# Conspiracy's paradox

# Conclusions

- Anxiogenous topics (like health) can trigger strong polarization
- Polarizzation splits the online community in isolated echo-chambers
- Polarised debates are centered on irrational and emotional issues
- “Aggressive” debunking enhances polarization
- In an healty sistem echo-chambers interacts and contribute to a kind of “biodiversity”
