

ASSET: WHAT IT IS

ASSET (Action plan in Science in Society in Epidemics and Total pandemics) is a EU co-funded 48 month Mobilisation and Mutual Learning Action Plan (MMLAP) program, that brings together partners with complementary perspectives, knowledge and experience, in order to develop an integrated, transdisciplinary, strategy for involving the public and different stakeholders in the response to infectious outbreaks at local, regional and national levels.

Share and move to face nasty bugs

ASSET: WHO WE ARE

- Absiskey, France

- Zadig srl, Italy

ASSET: WHAT WE DO

ASSET partners will share perspectives, knowledge and experiences among themselves and with the general public and relevant stakeholders (policy makers, HCP, industry,...), by testing tools such as: a Community of Practice for internal communication within the Consortium; a High Level Policy Forum; a Stakeholder Portal; Citizens' Consultations; Local Events and Activities; and analysis and activity on Social Media.
