Preparedness summit

Tuesday, April 19, 2016 - 09:00

The Preparedness Summit is the premier national conference in the field of public health and healthcare preparedness and one of the only cross-disciplinary learning opportunities to address issues such as global health security.

The goal of the Preparedness Summit is to provide a venue where participants are exposed to current information, research findings, and practical tools to enhance the participants' capabilities to plan and prepare for, respond to, and recover from disasters and other public health emergencies.

International Workshop on the World Wide Web and Population Health Intelligence

Friday, February 12, 2016 - 09:00

Severe pandemics due to highly transmissible viruses continue to threaten the world in the 21st century. In a tightly interconnected world, infectious disease outbreaks can adversely affect economic growth, trade, tourism, business and industry, and social stability as well as public and population health. Public health authorities and researchers now collect data from many sources, and analyze these data together to estimate the incidence and prevalence of different health conditions, as well as related risk factors.

EPIDEMICS 5: 5th International Conference on Infectious Disease Dynamics

Tuesday, December 1, 2015 - 09:00

Epidemics 5 will bring together international delegates for three days of intense dialogue on ideas, data, insight, models and methods in the field of infectious disease dynamics. Invited plenary speakers will lead a topical programme supplemented by around 80 contributed oral presentations and lively and stimulating poster sessions. A short course "[Using genomic data to uncover the dynamics of infectious diseases](#)" will take place on December 1, in advance of the main conference.

Topics include:

High-level meeting on refugee and migrant health

Monday, November 23, 2015 (All day)

Ministers and senior representatives of Member States in the European Region will meet to discuss the numerous public health challenges posed by large-scale movements of refugees and migrants to transit and destination countries. These range from management of communicable and noncommunicable diseases to the impact of large-scale migration on health systems. Given the inter-regional relevance of this topic, ministers from the main

countries of origin and of transit of refugees and migrants ? in the Eastern Mediterranean and African regions ? are also invited.
